

Warranty – Roles & Process

Customer warranty claims and back-to-back claims to the manufacturer · contact with customers and manufacturers is made manually – the system records each step and sends the alerts

	1 Register warranty	2 Report / raise claim	3 Verify & assign	4 Inspect & decide	5 Rectify	6 Manufacturer claim (RMA)	7 Recover & close
Senior Electrical Engineer Project Execution · Warranty officer	Enter warranty at project completion	Log claims from customers	Assign engineer ONLY Can verify & assign in one step	Decide: covered / chargeable / rejected	Choose: replace from DIMO stock now or wait for manufacturer replacement	Raise RMA – group covered claims per manufacturer Record contact, RMA no., manufacturer decision	Close claim · value recovered shared to the claims
Operations Executive Back end, coordination & back-up	Enter warranty: invoice / contract no., products, periods Register with manufacturer by due date	Log claims from customers	Verify claims raised by Sales / SM Projects	Coordinate customer & site access	Coordinate stock, delivery & customer	Return goods: courier, tracking, freight Back-up for warranty officer	Record GRN / credit note & value recovered
Assistant Engineers (3) Report to Sr. Elec. Engineer				Site inspection – findings, photos, batch codes	Rectify / replace on site	Provide evidence & failed units	
Sales person Own projects / categories		Raise claim or report issue from sales visit → To verify			Quote chargeable work if needed		Kept informed
SM Projects Approvals & escalation	Alerted if registration overdue	Raise direct complaints → To verify		Approve goodwill (covered although out of warranty)		Manufacturer rejects → Absorb or Escalate	Alerted on overdue manufacturer steps
Manufacturer / local agent External – contacted manually	Registration reference					Issues RMA no. · decides accepted / partly / rejected	Replacement / credit note / repair

Manufacturer claim (RMA) steps

- Contacted → RMA no. received → Goods returned → Decision → Replacement / credit received → Closed
- Rejected → SM Projects: Absorb → close or Escalate → decision reopened
- Registration rules, evidence needed and terms are set per manufacturer in the Manufacturers master list.

Automatic alerts

- Registration: 14 days before, due day, overdue (+ SM Projects)
- Covered claim, no RMA after 5 working days → Sr. Elec. Eng.
- No RMA no. 7 days after contact
- No decision 30 days after return (+ SM Projects)
- Not received 30 days after acceptance (+ Ops, SM Projects)
- Monday summary of open manufacturer claims

Key rules

- Claims by Sales / SM Projects start as To verify – Operations verifies.
- Only the Senior Electrical Engineer assigns engineers.
- Invoice or contract number required on every warranty.
- Goodwill cover needs SM Projects approval.
- Customer is never kept waiting for the manufacturer – DIMO stock can be used.
