# 1 Getting started

## Who uses what

| Role                 | Uses                        | Can do                                                                                    |
|----------------------|-----------------------------|-------------------------------------------------------------------------------------------|
| Salesperson          | Android / iPhone app        | Record visits, customers, contacts, projects, packages and follow-ups for their territory |
| Sales manager        | Web dashboard (and the app) | See everything, dashboard, Excel reports, plan visits for the team, approve corrections   |
| Estimator / designer | App or web                  | See assigned projects, add technical notes, milestones and quotations                     |
| Administrator        | Web dashboard               | Users, lists, stages, settings and exchange rates                                         |

## Install and sign in

- 1 **Phone:** open the install link your administrator sends you on the Android phone, download the file and tap **Install**. If Android asks, allow “Install unknown apps” for your browser.
- 2 **Computer / iPad:** open the dashboard web address your administrator sends you. Tip: add it to your bookmarks or Home Screen.
- 3 Sign in with your **work email** and the **password** you received. Change nothing else.
- 4 If you see **“Waiting for access”**, your account has not been switched on yet – ask your administrator, then tap **Check again**.

Sign-in screen

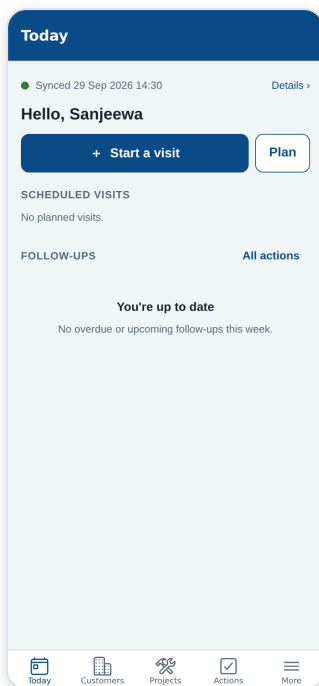

**Good to know:** Your login decides what you see. Salespeople only see accounts and projects in their own territory; managers see all.

## 2 Your day – the Today screen

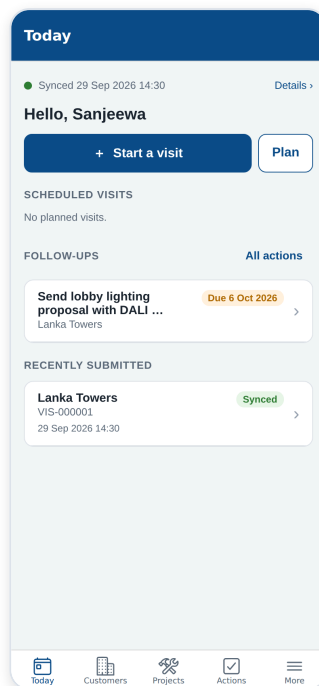

The **Today** tab is your home page. It shows:

- **Sync line** (top): ● green = everything is sent · ● amber = offline or waiting to send · ● red = a visit needs your attention. Tap it for details.
- **Start a visit** – record a visit now. **Plan** – put a future visit on your agenda.
- **Scheduled visits** – your planned visits. Tap one to start it.
- **Follow-ups** – actions that are overdue or due this week.
- **Recently submitted** – visits that reached the office, with their reference (VIS-...).

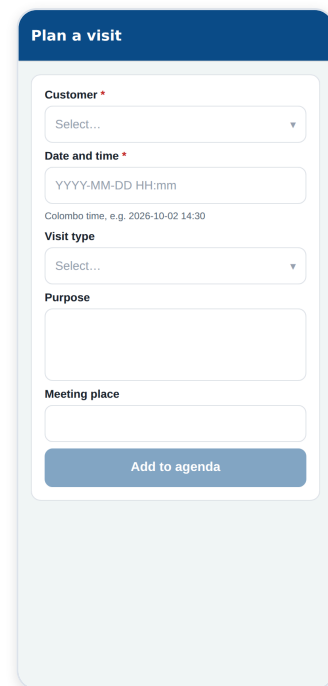

The tabs at the bottom are: **Today** · **Customers** · **Projects** · **Actions** · **More** (managers also see **Dashboard**). Pull down on any list to refresh it.

Today – start of the day

After a visit: follow-up and synced visit

Plan a visit

## 3 Recording a customer visit

Tap **Start a visit** (or **Start visit** on a customer's page). Everything you type is **saved automatically as a draft** on the phone – you can close the app and continue later, even without signal. Fields marked \* are required.

### Step 1 – Choose the customer

- 1 Tap **Customer** and type part of the name.
- 2 Pick the customer from the list. If it is a new customer, tap **+ New customer**.
- 3 For a new customer, the app shows **possible existing customers**. If it is the same organisation, tap **Use this** instead of creating a duplicate.

Search for the customer

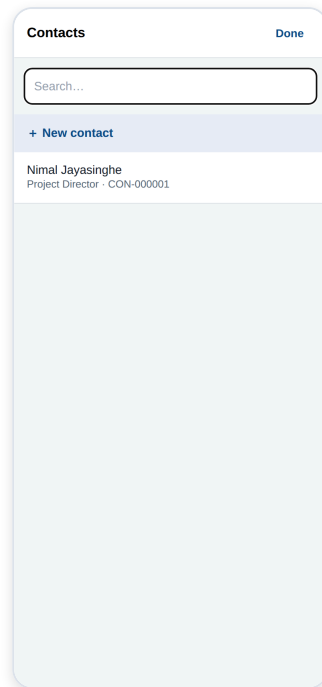

Duplicate warning – tap “Use this”

### Step 2 – People met

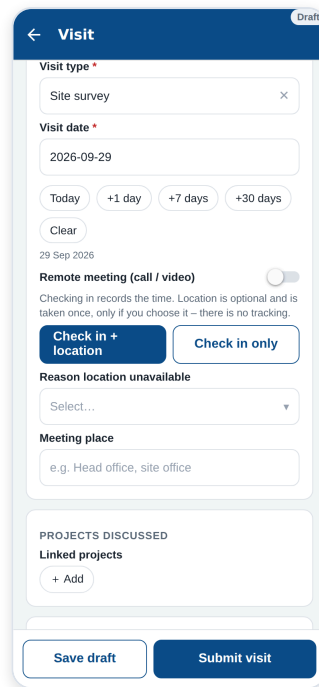

- 1 Under **Contacts** tap **+ Add** and tick the people you met, then **Done**.
- 2 Someone new? Tap **+ New contact** and enter name, designation, phone and email.
- 3 Met nobody? Choose a **reason no contact is recorded** instead.

### Step 3 – Visit type, date and check-in

- 1 Choose the **Visit type** (e.g. Follow up, Site survey). The date is today by default.
- 2 At the site tap **Check in + location** (records the time and your GPS once) or **Check in only** (time only). There is **no tracking** – location is only taken when you tap.
- 3 Tap **Check out** when you leave. For phone or video calls switch on **Remote meeting**.

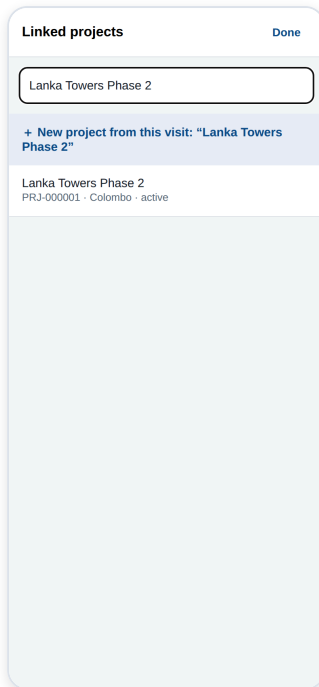

Pick the people you met

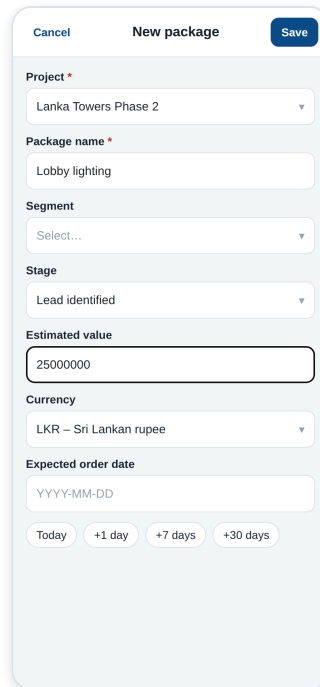

Visit type and check-in

## Step 4 – Projects and packages

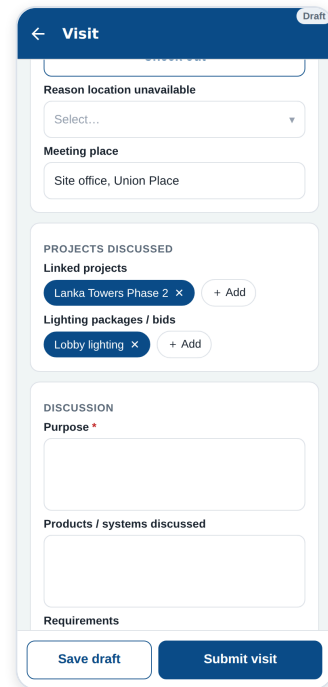

- 1 Under **Projects discussed** tap **+ Add** and choose the project. For a new project tap **+ New project from this visit** – the customer and the people you met are added as stakeholders automatically.
- 2 Under **Lighting packages / bids** add the package discussed (e.g. “Lobby lighting”) with value, currency, stage and expected order date.

Link a project

Add a package / bid

Project and package linked

## Step 5 – Discussion, commercial signal and outcome

- 1 Fill in the **Purpose\*** and what was discussed: products, requirements, pain points, budget and timeline.
- 2 Under **Commercial signal** note the estimated value, confidence, competitor and risks.
- 3 Write the **Meeting summary\*** and choose the **Visit outcome\***. Add the next meeting date if agreed.

The screenshot shows the 'Visit' form with a 'Draft' status. The 'Discussion process' section includes fields for 'Decision process', 'Budget indication', 'Funding status' (with a 'Select...' dropdown), and 'Expected purchase / tender timeline'. The 'COMMERCIAL SIGNAL' section includes 'Estimated value', 'Currency' (set to 'LKR – Sri Lankan rupee'), 'Confidence' (with 'Low', 'Medium', and 'High' radio buttons), 'Competitor' (with 'Brand X' entered), and 'Incumbent supplier'.

Discussion and commercial signal

The screenshot shows the 'Visit' form with a 'Draft' status. The 'DIMO differentiator' and 'Risks or blockers' sections are empty. The 'OUTCOME' section includes a 'Meeting summary \*' field with the text 'Measured the lobby at 120 lux. Client wants 300 lux with DALI dimming. Asked for a proposal by next week.', a 'Visit outcome \*' dropdown set to 'Quotation requested', and empty fields for 'Commitments made' and 'Documents shared'.

Summary and outcome

## Step 6 – Next actions and photos

- 1 Tap **+ Add action**: what needs to happen, due date, owner and priority. Add at least one – or choose a “no follow up” reason.
- 2 Tap **Take photo**, **Choose photo** or **Attach file** to add site photos, drawings or documents. They upload when the visit is sent.

The 'Next action' form is displayed with a light blue background. At the top, there are 'Cancel', 'Next action', and 'Save' buttons. The form contains several sections: 'What needs to happen' with a text input field containing 'Send lobby lighting proposal with DALI controls'; 'Due date' with a date picker showing '2026-10-06' and buttons for 'Today', '+1 day', '+7 days', '+30 days', and 'Clear'; 'Owner' with a dropdown menu showing 'Sanjeewa Perera'; 'Priority' with radio buttons for 'Low', 'Normal', 'High' (selected), and 'Urgent'; and 'Related project' with a text input field containing 'Lanka Towers Phase 2'.

Add a next action

The 'Visit' form is displayed with a dark blue header and a light blue body. At the top, there are back, 'Visit', and 'Draft' buttons. The form contains several sections: 'Documents shared' and 'Documents requested' with text input fields; 'Next meeting' with a date and time input field showing 'YYYY-MM-DD HH:mm' and a note 'Colombo time, e.g. 2026-10-02 14:30'; 'NEXT ACTIONS' with a list of actions, including 'Send lobby lighting proposal with DALI controls' by 'Sanjeewa Perera' due '6 Oct 2026' with 'high' priority, and buttons for '+ Add action', 'Edit', and 'x'; 'PHOTOS AND DOCUMENTS' with buttons for 'Take photo', 'Choose photo', and 'Attach file', and a note 'Files are uploaded to secure storage when the visit syncs.' At the bottom, there are 'Save draft' and 'Submit visit' buttons.

Actions and photos

## Step 7 – Submit

- 1 Tap **Submit visit**.
- 2 If something required is missing, the app lists it in red – complete it and submit again.
- 3 The visit is sent at once, or automatically as soon as you have signal. Its reference number (VIS-...) appears on the Today screen.

The left screenshot shows the 'Visit' form with the following fields and options:

- Missing:** Customer, Contact met, or reason unavailable, Visit type, Purpose, Meeting summary, Outcome, Next action, or "no follow up" reason
- CUSTOMER:** Customer \* (Select...)
- PEOPLE MET:** Choose the customer first. Or: reason no contact is recorded (Select...)
- VISIT:** Visit type \* (Select...), Visit date \* (2026-09-29, Today, +1 day, +7 days, +30 days)
- Buttons:** Save draft, Submit visit

The right screenshot shows the 'Today' screen with the following information:

- Status:** Synced 29 Sep 2026 14:30
- Greeting:** Hello, Sanjeewa
- Buttons:** + Start a visit, Plan
- SCHEDULED VISITS:** No planned visits.
- FOLLOW-UPS:** All actions
- RECENTLY SUBMITTED:** Lanka Towers (VIS-000001, 29 Sep 2026 14:30, Synced)

Missing fields are listed

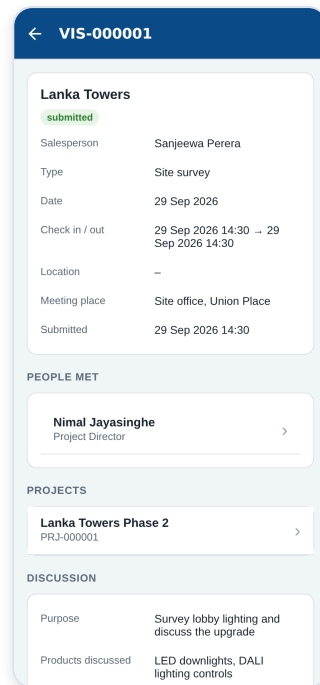

Submitted and synced

**Tip:** Not finished? Tap **Save draft**. Drafts stay under “On this device” on the Today screen.

## 4 After you submit

A submitted visit becomes part of the official history and **cannot be edited**. If something is wrong:

- 1 Open the visit (Today > Recently submitted, or from the customer page).
- 2 Tap **Request a correction**, give the reason and fill only the fields that need to change.
- 3 Tap **Send**. Your manager approves it; the original stays in the audit history.

## 5 Customers and contacts

- The **Customers** tab lists your accounts. Search by name, code or city; **My accounts** shows only the ones you own.
- Open a customer to see details, contacts, projects, open actions, the full **visit history** and files.
- From a customer you can **Start visit**, **Plan visit**, **Edit**, add a **Contact**, a **Project** or an **Action**.
- Tap a phone number or email to call or write directly.

Customers list

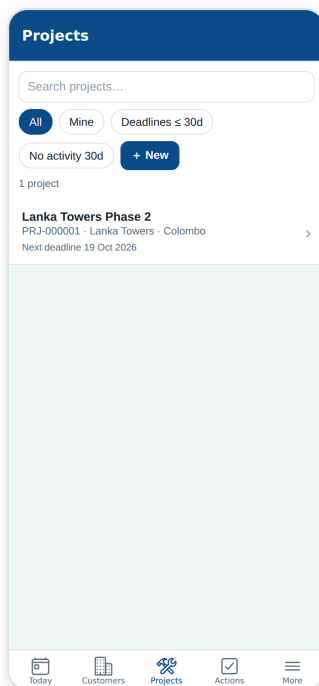

Customer page

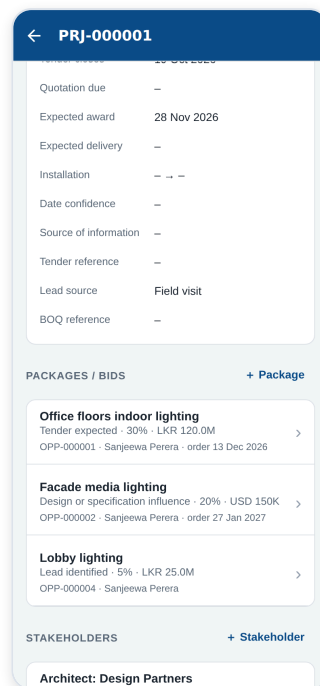

## 6 Projects, packages and stages

Each physical project or tender exists **once**. Everyone's visits, the consultants, contractors and other stakeholders, and all lighting packages hang off the same project.

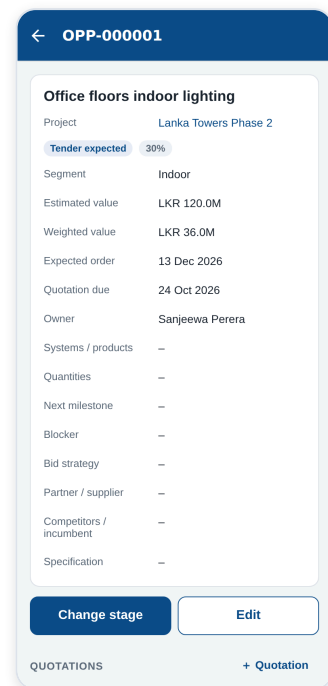

- **Projects** tab: search, or filter **Mine**, **Deadlines ≤ 30d** and **No activity 30d**.
- A project page shows scope, commercial details, timeline, **packages / bids**, stakeholders, team, milestones, technical notes, actions and visit history.
- Open a package and tap **Change stage** to move it through the pipeline (Lead → Qualification → ... → Won / Lost). Some stages ask for extra details – for example a reason and award date when a package is won.
- Quotations and their revisions are added on the package page (+ **Quotation**).

## 7 Follow-up actions and reminders

- The **Actions** tab shows your open actions; **Overdue** shows the late ones in red.
- Open an action to **Mark done**, add the result, change the due date or owner, or **escalate** it to a manager.
- You get a phone **reminder** the day before an action is due. Actions overdue for several days are escalated to your manager automatically.

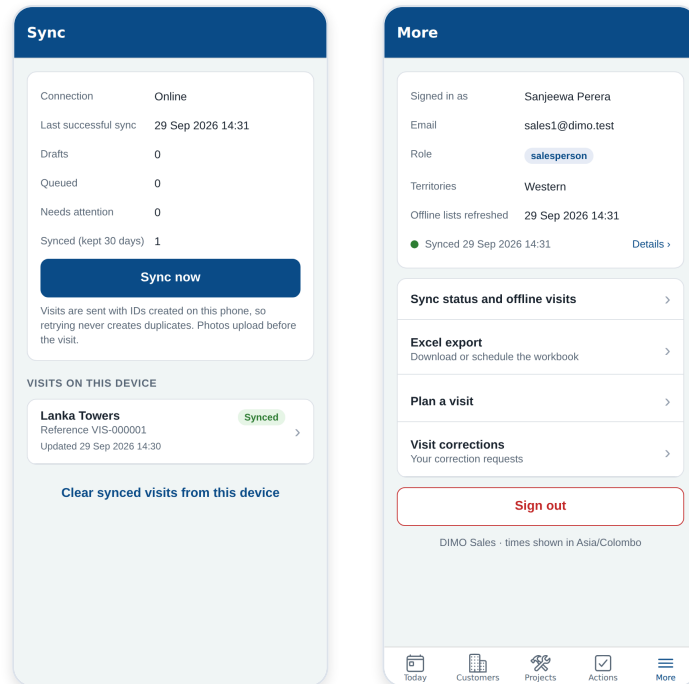

My actions

Update or mark done

## 8 Working without signal

- You can record complete visits – including new customers, projects and photos – **with no signal**.
- Submitted visits wait as **Queued** and are sent automatically when the phone is back online. Sending twice never creates duplicates.
- **More › Sync status** shows the connection, the last successful sync and every visit stored on the phone. Tap **Sync now** to send immediately.
- If a visit shows **Needs attention**, open it, read the message, fix it and submit again.

**Important:** You cannot sign out while visits are still waiting to be sent – this protects your work.

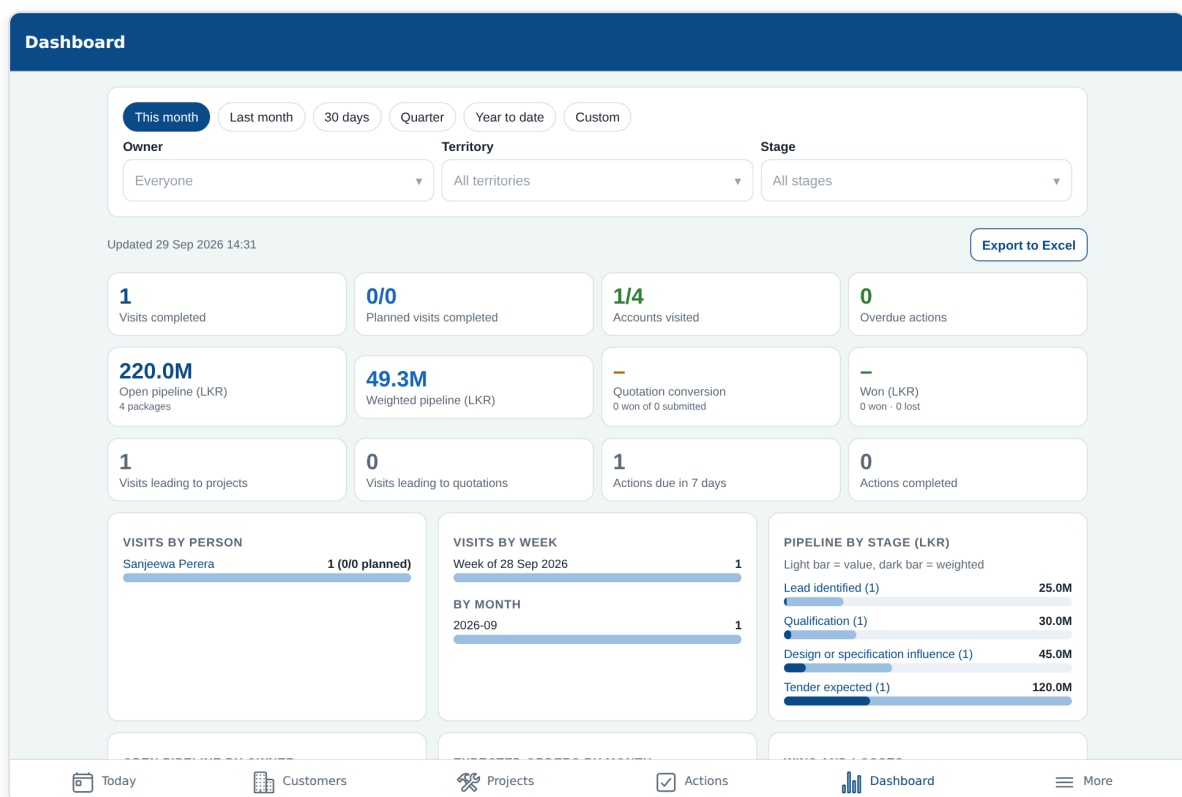

Sync status

More menu

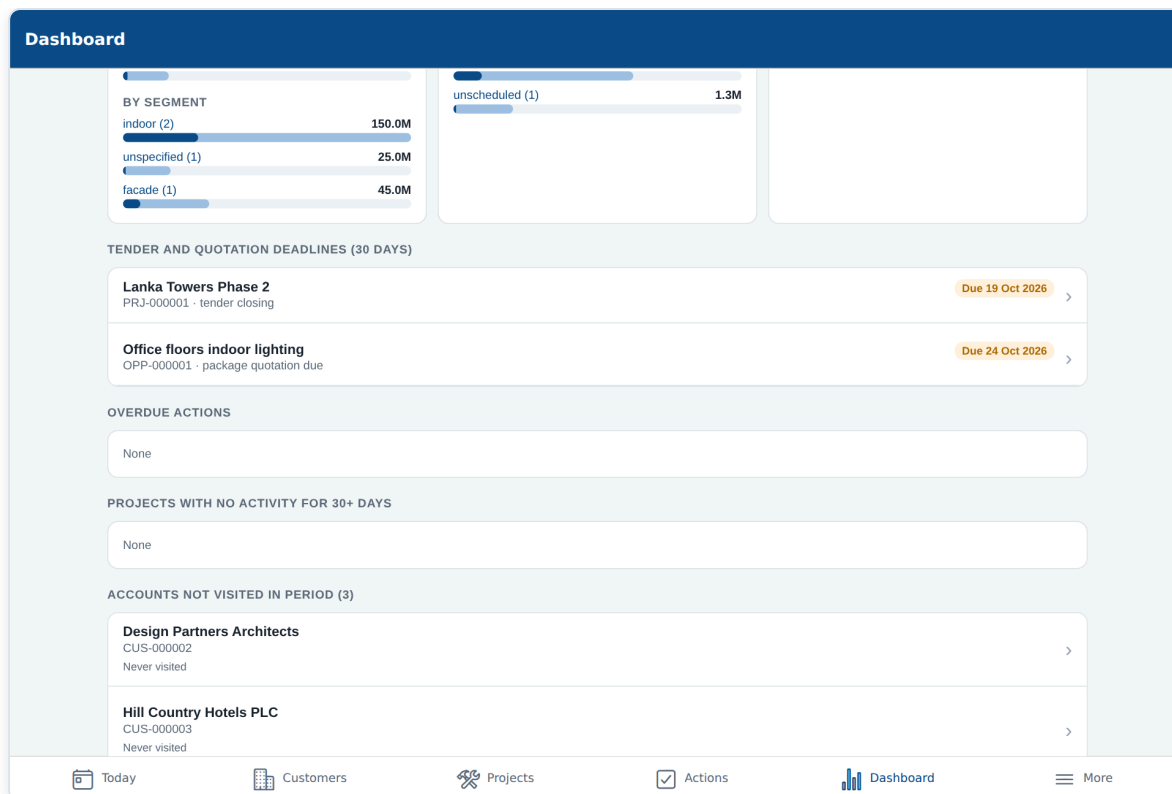

## 9 Managers – the web dashboard

Open the dashboard address on a computer or iPad and sign in. The **Dashboard** tab updates live as visits are submitted.

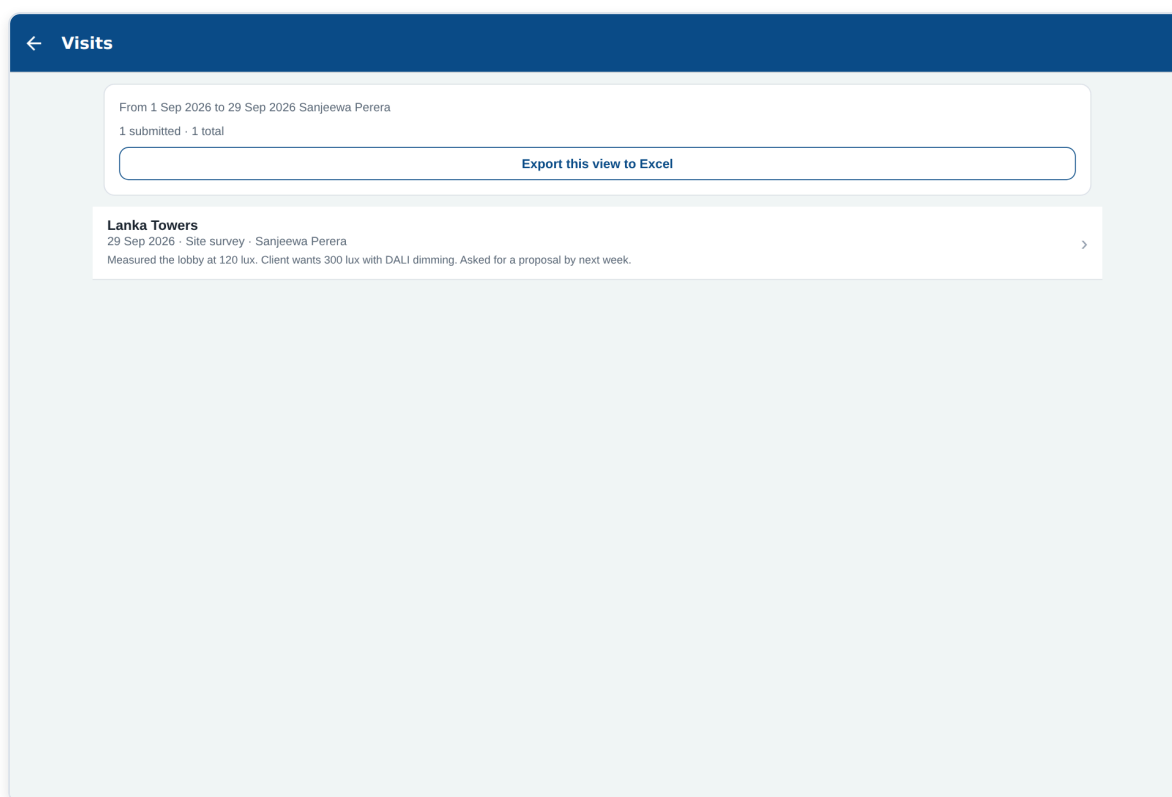

- 1 Choose the period (This month, Last month, 30 days, Quarter, Year to date or Custom), and optionally an **Owner**, **Territory** or **Stage**.
- 2 Read the tiles: visits completed, planned vs completed, accounts visited, overdue actions, open and weighted pipeline, quotation conversion and wins.
- 3 **Tap any bar or tile** to see the records behind it – e.g. tap a salesperson to list their visits, or a stage to list its packages.
- 4 Scroll down for tender deadlines, overdue actions, projects with no recent activity and accounts not visited.

Manager dashboard

Deadlines, overdue actions and accounts not visited

Drill-down: the visits behind a figure, with "Export this view to Excel"

**Good to know:** Pipeline values are shown in LKR. Packages in other currencies are converted with the exchange rates under More > Exchange rates.

## 10 Managers – Excel reports and approvals

### Excel export

- 1 Open **More > Excel export** (or **Export to Excel** on the dashboard).
- 2 Choose the period and filters, then tap **Create Excel workbook**. The file downloads (on a phone you can share it).
- 3 The workbook has a **Read Me**, a **Summary** matching the dashboard, and one sheet each for Customers, Contacts, Visits, Projects, Opportunities, Stakeholders, Actions, Quotations and the Audit Log.

## Approving corrections and planning visits

- **More › Visit corrections** lists salespeople's correction requests with the proposed changes – tap **Approve** or **Reject** (with an optional note).
- **More › Plan a visit** lets you put a visit on a salesperson's agenda.
- **More › Audit log** shows who changed what and when, including every export.
